

MTT ALADDIN

OVERVIEW

The Aladdin Tensile Marquee is designed to offer a unique aesthetically pleasing futuristic look as well as a practical, and stable functional design.

SELLING POINTS:

The design gives very easy access into the structure because of the absence of side poles, pegs and ropes. The eliminating of pegs and side poles between the arches does away the likelihood of anybody tripping over the non-existent pegs and side poles as in other pole type structures. Another big advantage of the absence of side poles, due to the tensile patterning, the fewer anchor points required contributes to the ease and speed of the installation. Although the Aladdin is not extendible, it is able to be joined to another of the same size, with a purpose-made, water proof connection system. The Aladdin is available with both 'window' and 'plain' side walls. The unique shape of the Aladdin enhances its stability in windy conditions.

STANDARD SIZES:

4.5m x 4.5m / 6m x 6m / 6m x 9m / 9m x 9m / 9m x 12m / 9m x 15m / 12m x 12m / 12m x 18m

USES: (small to medium sized venues)

Corporate branding, event tents, displays, auxiliary tents, weddings etc.
Day-trips to the dam, the Aladdin makes for a practical larger 'Gazebo-type' shelter.
Small weddings and events.
