

MTT ALUHALL

OVERVIEW

The Aluhall is an extendable clear span portable frame structure manufactured from a high grade aluminium alloy and covered with PVC fabric.

The roofs and fabric walling which are in sections, slide through grooves that are extruded in both sides of the aluminium, by their keder edging.

There is a variety of wallings to choose from;

Fabric, solid insulated, ABS, glass panels, doors (single-double-glass,)

Optional Extras:

Flooring, lighting, draping, tables, chairs, hammers, peg pullers ,A/C.

SELLING POINTS:

- Because of the extruded aluminium frame, the fabric roof and walling sections can be pulled through the frame from the ground making assembling quick and easy without ladders.
- This also eliminates the need not having to lace the sections together thus saving erection time.
- Maintenance is low because the frame is Aluminium therefore no rust.
- The roof panels have special erection bags that keep the fabric from touching the ground cutting down cleaning of fabric.
- The panels can be removed independently without having to drop the frame in the case of cleaning or repairing.

STANDARD SIZES:

- Alu Party Tent comes in widths of 3m- 6m - 9m and 10m and extends in 3m bays.
- The Alu-Hall ranges in width from 10m to 50m and extends in modules of 5m.

USES:

The Alu-Hall is designed to be used in most applications requiring a free-standing and clearspan alternative, from the smallest walkway to the largest corporate function, indoor sporting events, weddings and warehousing.
