

# MTT BERG

## OVERVIEW

These are a range of smaller FTP (fully tensile patterned) tents that consist of a single row of patterned peaks. The perimeter of the structure is anchored by webbing and ratchets secured to the edge of the fabric at the top of the side poles and to the pegs in the ground.

## SELLING POINTS:

- With the patterned roof, side poles, the webbing and ratchet tie downs the structure is very stable.
- The shape makes it aesthetically pleasing to the eye.
- The patterning reduces both the flapping and noise factors to a minimum.
- Using the ratchets and webbings instead of side ropes makes it quicker and easier to erect.

## STANDARD SIZES:

- 5m x 5m
- 6m x 6m can be extended with 6m extensions
- 10m x 10m extended with 5m extensions
- 15m x 15m extended with 10m extensions
- 18m x 18m extended with 10m extensions

## USES: (small to medium sized venues)

Events, stalls, displaying, churches, general.
