

MTT CABANA

OVERVIEW

A mild steel mono slope designed structure primary designed with the high side to go against a wall and sloped down towards the front. There is a variety of wallings to choose from; Fabric, solid insulated, ABS, glass panels, doors (single-double-glass,)

Optional Extras:

Flooring, lighting, draping, single & double doors, hammers, peg pullers, A/C.

SELLING POINTS:

- They can be extended by placing them in rows side by side.
- Relatively easy to erect.
- They can be reversed in order to use as stalls at fairs using the high side for the advertising.

STANDARD SIZES:

- 5m x 4m module
- 3m x7m module
- 10m x 6m module
- Custom sizes can be manufactured.

USES: (small to medium sized venues)

It could be reversed placing the high side in the front for stalls at fairs and using the high side as an advertising banner for the stall.

It can be used for extending a room by placing the high side against the opening in a wall or a verandah where one wants the rain to flow away from the wall.
