

MTT SNOWPEAK

OVERVIEW

Our Exclusive Snowpeak Tensile Structure is at the forefront of Tensile Tent Technology, offering a dramatic aesthetic appeal and WOW-Factor! An ideal semi or permanent structure suitable for any large venue.

Optional Extras:

Solid walling, insulated panels, glass panels, solid doors, Air conditioning, Carousels, Lightning, Peg pullers, Flooring.

SELLING POINTS:

- Framed walling System - looking neater and more secure offering solid or fabric sidewalls.
- Relatively easy assembly.
- Spectacular aesthetics - incomparable to any other in the temporary, demountable arena.
- With the Tensile Roof extending from the top of the Peaks to ground-level, this makes for a very stable and protected venue from both wind and rain.
- Because of the arched perimeters and the walling set back, the arches form over hangs that protect the walling from the rain and inclement weather.
- They also stop the rain from getting under the walls and keeps the inside dry.
- No guide ropes to trip over!

STANDARD SIZES:

- 25m x 15m extendable in 10m modules
- 35m x 20m extendable in 15m modules
- 45m x 30m extendable in 15m modules
- 55m x 30m extendable in 20m modules

USES:

A high-level entertainment venue for the larger, more prestigious functions as well as: churches, corporate functions exhibitions etc.
